I'm a Web Designer & Developer from Eugene, Oregon.

In 2016, I started managing web content while running community sports leagues. It began with minor tweaks to HTML and CSS and eventually led me to building front-end embeddables using JavaScript. Now, I never stop designing and building. I build games, websites, and applications of varying complexity. My goal is always to make products that are both user-friendly and highly optimized. I'm frequently focused on the front-end, but I won't hesitate to go full-stack when a project calls for it.

I Use

HTML5/CSS
JavaScript ES6
jQuery
Node.js
Express.js
APIs
React

Work History

- Sports Programming Coordinator, Willamalane (2022-Present)
- Owner, EW Custom Web Applications (2022-Present)
- Section Manager, City of Eugene (2016-2022)
